

I respectfully urge the FCC to reject the NAB's petition 04-160. To accept this petition would be to effectively strangle any competition to NAB. The service and entertainment provided by XM Satellite Radio is immeasurable. I receive clear, static free transmission as compared to unclear static radio in my home and where I travel.

In addition the channels offered allow me to select a much higher variety of programming than what is available locally or when travelling.

Let's not stifle growth and quality in radio by allowing NAB to monopolize radio programming.
